

When you have something important to say, nothing is more important than face-to-face contact.

Establish your organization as a key force in improving the use of innovative environmental technologies and processes.

Industry Affiliates Program

The Interstate Technology & Regulatory Council (ITRC) welcomes you to its Industry Affiliates Program (IAP). Establish your organization as a key force in improving the use of innovative environmental technologies and processes:

- **information** exchange on the development and deployment of innovative environmental technologies
- **participation** in ITRC technical teams that produce technical regulatory guidance documents and training

Joining IAP allows your organization to:

- advance understanding of innovative environmental technologies and approaches
- anticipate important technical or regulatory developments
- improve decision making when innovative environmental technologies are used
- obtain regulatory consensus on appropriate innovative environmental technologies
- network with people from all aspects of the environmental community
- gain exposure in the environmental industry

About ITRC

ITRC is a state-led coalition of regulators, industry experts, public stakeholders, academia, and federal partners that work to achieve regulatory acceptance of innovative environmental technologies. ITRC is working to break down barriers and reduce compliance costs, making it easier to use new technologies and helping to maximize resources. ITRC brings together a diverse mix of environmental experts and stakeholders from both the public and private sectors to broaden and deepen technical knowledge and advance the regulatory acceptance of environmental technologies. Together, we're building the environmental community's ability to expedite quality decision-

making, while protecting human health and the environment. For more information about ITRC, please visit www.itrcweb.org.

Value of ITRC

Paul Beam, DOE, says, "We believe the collegial interaction among regulators, stakeholders, and our consultants in the development of ITRC guidance documents has a long-term benefit to accelerate the use of innovative remediation technologies and closure at our sites."

Liz Denly, TRC, says, "Our staff at TRC have relied upon ITRC technical-regulatory guidance documents and webinars for many years. Now, as an IAP member, we are able to be part of the process and contribute to these important documents. It has been a rewarding experience for TRC to participate in the ITRC model of broad collaboration and consensus-building with multiple stakeholders."

Dan Bryant, Woodard & Curran, says, "I have been an IAP member for 10 years. I find great professional value in the documents we have produced, drawing on the interaction with many very experienced and talented people who have a wide range of backgrounds, training, and perspectives. We also benefit from the personal and networking relationships developed over the years. It is a great investment!"

Jeremy Musson, Pinyon Environmental, says, "As a small business our internal resources for technology development are limited by both time and money, so ITRC is a great way to keep up with new developments and meet the experts leading the charge. I frequently reach out to some of those people I met during the first few years when we are faced with a particularly challenging situation on our projects."

Paul Parmentier, Apex Companies, says, "The ITRC discussion on Natural Source Zone Depletion prompted us to gather more data from our site, including background temperature measurements. We are very grateful to the ITRC webinar's timely distribution of state-of-the-art science because it provides extremely useful information to guide our site cleanup."

IAP Membership Details

- Join IAP as a Platinum, Gold, or Standard Member by going to: www.itrcweb.org/IAP/Application
- Membership in IAP is per company. All member company employees are welcome to participate in ITRC and IAP
- All IAP companies are encouraged to participate on as many teams as they desire, but ITRC suggests no more than 2 individuals from a company participate on the same team
- Membership runs on a calendar year

Benefits of Membership

Platinum Member: Large logo/acknowledgment on ITRC signs at meetings & website; two free classroom training registrations; and free registration and exhibit space at our annual meeting

Gold Member: Large logo/acknowledgment on ITRC handouts and website; 25% discount on classroom training registration; and free registration for all employees at our annual meeting.

Standard Member: Smaller logo/acknowledgment on ITRC handouts and website; 15% discount on classroom training registration; and discounted registration for all employees at our annual meeting.

NOTE: ITRC does not endorse nor recommend any specific trade names.
