About the Interstate Technology and Regulatory Council (ITRC)

The Interstate Technology and Regulatory Council (ITRC) is a state-led coalition of regulators, industry experts, citizen stakeholders, academia, and federal partners that work to achieve regulatory acceptance of environmental technologies and innovative approaches. ITRC's guidance documents, training courses, and network of experts provide resources to assist the environmental community in making quality, expedited decisions when determining the appropriateness of environmental technologies as part of effective environmental waste management.

Overall Participation in ITRC's Training 6/1/1997 to 06/30/2018

ITRC Addresses Innovative Environmental Technologies and Approaches

ITRC training courses are developed and delivered by ITRC's technical teams and typically based on the teams' technical and regulatory guidance documents. The ITRC instructors are working environmental experts -- state regulators, environmental consultants, and federal employees. Our training courses are catalysts for quality decision-making, leading to cost-effective applications of innovative technologies and approaches. These tools and resources provide consensus-based and consistent guidance for all sectors in the environmental community to use collectively.
